SMV Relations with USIA

There is some speculation among SMV emptoyees as to reasons underlying the tension evident in current relations between SMV and USIA officials. They feel that SMV officials are in a relatively strong position because USIA's Central Commercial Bureau has assigned one of its most trusted employees to the SMV to expedite the immediate sale of the SMV Lobau warehouse stocks.*

SMV Agreement with the Austrian National Railways

- KUSIN, Director of the SMV Purchasing Office, continues to reorganize most of the established procedures of this SMV office. SMV employees find him reserved, cynical and hostile to the Austrian employees. He is particularly contemptuous of all Austrian enterprises, an attitude which was apparent in his recent dispute with the Austrian National Railways.
- 3. XUSIN proposed that the SMV transact its business with the railways on a credit basis, that it pay its railroad traffic charges by checks drawn from the Soviet Military Bank only after service had been rendered. Railroad officials, however, insisted that the SMV make a down payment of 100,000 schillings per month and agreed that they would accept payment by check from the Soviet Military Bank for all Soviet shipments in excess of this 100,000 schilling down payment. Railroad officials further requested KUSIN to subwit a precise accounting of SMV depts to the railroads at the end of each month. After considerable controversy, KUSIN agreed to these demands. A few days ago, in the course of preparing this monthly accounting, the SMV Purchasing Office discovered that the only SMV enterprise which has an appreciable credit with the Austrian National Railways is wifo-Lobau, which also has a sizeable credit with the Austrian Government. When KUSIN learned of the Wifo-Lobau credit, he proposed that the Austrian National Railways apply this credit against future debts of all SMV enterprises. This proposal was finally accepted by railroad officials.
